Capric. causing in this our north Latitude Solsti-
tial, that is the shortest day and longest night of all the
yeere. The Sun separate last from a quartile of the moone,
and conjunction of Venus therfore I do conjecture,
and dispositions both of the planettes and firmi-
ments beginning of this present Winter will bee very
pestilentiall, with great stormes of raine and winde,
floodes and waters to swell and burst out to the great
damage of many persons, both the wayfaring men and especial-
ly the poore.

The first part of this Resolution is called which hath iii. monethes of the Sunne during June at vi. a clocke at night.

The second part is called the Sommer, and day of June at vi. a clocke at night which hath and continueth until the xiii. day of September in the morning.

In considering wel this first Resolution by I doe finde Scorp. Ascendent, Mars Lord of the dy of the vii. house, & in the signe of Aquar. place with Mars. The Moone in the ix. house separate aspect of Mercurie, & applieth to a trine of house, where Iupiter and the Sun is. Therefore conjecture by the dispositiō of the said planets that in this Spring time there is like to be windes and stormie blastes, one throwing bo in many places, greate distemperance of wance of many persons in their trauell and but the earth shall susteine detriment, wines this detre. Grasses shall not gaine much by realitie that is like to ensue amongst cattes.
